F • AUR • M
“form”

F • AUR • M is as much a VR experience as it is experimental performance art. Combining frequential audio, gravitational physics, indeterminate scale, as well as light art, F • AUR • M lets the user create order or chaos at will while simultaneously allowing an audience to see the consequences of each decision. While the user has a confined space to experiment within, the audience is able to see a far more comprehensive view of the user’s experimentation.
Past Work:

**Duality**

da series of portraits created using two sidelights to create a split color on the subjects face

**Beam**

da series of portraits created with intense backlight, framing the subjects in colors they have chosen to match their individual personalities
Luminescence

a series of long-exposure light paintings created in a single exposure without the use of digital manipulation

Revolve

a series of long-exposure photos showing the apparent “paths of stars” created by stacking
1323 - Sleepwalking

a music video shot, directed and edited singlehandedly as proof-of-concept for future work with the up-and-coming pop duo, 1323
